Application Developer

Description

As an Application Developer for SAP Business Planning and Consolidation (SAP BPC), you will be responsible for designing, building, and configuring applications to meet business process and application requirements. Your typical day will involve working with SAP BPC, collaborating with cross-functional teams, and delivering impactful data-driven solutions.

Responsibilities

- Lead the design, development, and implementation of SAP BPC applications to meet business process and application requirements.
- Collaborate with cross-functional teams to identify and prioritize business requirements, ensuring alignment with overall business objectives.
- Configure and customize SAP BPC applications to meet specific business needs, utilizing knowledge of SAP BPC architecture and functionality.
- Provide technical expertise and guidance to team members, ensuring adherence to best practices and standards for SAP BPC development.
- Develop and maintain technical documentation, including design specifications, test plans, and user manuals.
